

AP Lang practice score worksheet

Princeton Review Practice Test 1

Model lang-pr-test1-9780593517086-v1

Use only with the identified practice form. This is a practice AP estimate, not an official AP score or a prediction for any future exam.

Name _____ Date _____

1

Record your scored work

Use whole numbers. Score each essay with the rubric for this practice form.

Input	Allowed range	Your score
M Multiple-choice answers correct	0 to 45	_____
S Synthesis essay	0 to 6	_____
R Rhetorical analysis essay	0 to 6	_____
A Argument essay	0 to 6	_____

E Essay total = S + R + A = _____ out of 18

2

Calculate without rounding early

Multiple-choice points $M \times 1.5000 =$ _____

Essay points $E \times 4.5833 =$ _____

Unrounded composite Add both results = _____

Rounded composite Nearest whole number = _____ / 150

Keep all decimal places until the final line. Use exactly 1.5000 and 4.5833. For an exact .5 tie, ScoreDino rounds up.

3

Find your practice AP estimate

0-54	55-79	80-97	98-111	112-150
1	2	3	4	5

Top row: rounded composite /150. Bottom row: practice AP estimate.

My practice AP estimate _____ Review the example and make a plan on page 2.

Use your result to choose a next step

The estimate is most useful when it points you toward a specific skill to practice. Its accuracy depends on the accuracy of your essay scores.

1

Check a complete example

Example inputs: 32 correct; essay scores 4, 4, and 5.

Essay total	$4 + 4 + 5 = 13$
Multiple-choice points	$32 \times 1.5000 = 48.0000$
Essay points	$13 \times 4.5833 = 59.5829$
Unrounded composite	$48.0000 + 59.5829 = 107.5829$
Rounded composite	107.5829 becomes 108 / 150
108 falls in the 98-111 band, so the practice AP estimate is 4.	

2

Keep the result in context

Round once. With 18 correct and 6 essay points, the composite is 54.4998. The final result rounds to 54, giving a practice estimate of 1. Changing it to 54.5 first would give the wrong estimate.

Keep the scales separate. This model uses a composite out of 150. A weighted performance result out of 100 is a different measure; do not apply these score bands to a /100 result.

Keep the form attached. These bands belong to the identified Princeton Review Practice Test 1 worksheet. They do not establish College Board cutoffs for another form, exam year, or future test.

3

Make one focused practice plan

For multiple choice, explain the evidence for a missed answer and why your choice failed. For an essay, select a rubric row and revise a passage to address it; ask a teacher or peer to check your reasoning.

One skill I will work on _____

My next practice action _____

I will review it on _____ with _____
