

AP Psych practice scoring worksheet

Weighted practice points out of 100

Use this sheet to calculate transparent weighted practice points. It does not convert a result to an AP score from 1 to 5.

Name _____ Date _____

01 Record your earned points

Use whole numbers and the matching question rubrics. Write 0 only when no points were earned.

Input	Allowed range	Your score
Multiple choice	0 to 75	_____
Article Analysis Question	0 to 7	_____
Evidence-Based Question	0 to 7	_____

02 Calculate the section contributions

Multiple choice	$\text{raw} \div 75 \times 66.7$	_____
Article analysis	$\text{raw} \div 7 \times 16.65$	_____
Evidence-based question	$\text{raw} \div 7 \times 16.65$	_____
Add the unrounded contributions	_____	/ 100

Keep full precision until the final result, then display one decimal place. This weighted total is a study measure, not an official composite or a passing-score cutoff.

Use the redesigned seven-point AAQ and EBQ rubrics. For the AAQ ethics task, identify the ethical guideline and describe how it was applied in the study.

Practice test / question source _____

Rubric or scoring-guide date _____

Check the example and choose a next step

01 A complete worked example

MCQ 55/75; AAQ 5/7; EBQ 6/7

Multiple choice	$55 \div 75 \times 66.7$ about 48.9133
Article analysis	$5 \div 7 \times 16.65$ about 11.8929
Evidence-based question	$6 \div 7 \times 16.65$ about 14.2714

The unrounded sum is about 75.077619, displayed as 75.1 / 100. The section values above are shown to four decimals; retain full precision when adding.

The published weights are 66.7%, 16.65% and 16.65%. Keep these decimals rather than replacing 66.7% with exactly two-thirds. Full MCQ with no FRQ points gives 66.7; full FRQ with no MCQ gives 33.3.

02 Use the result to plan a specific repair

Read the study carefully. For an AAQ you practiced, identify the research method and operational definition. Explain what a reported statistic means in the study.

Connect evidence to a claim. For the EBQ, name a source, select relevant evidence, and explain how a psychological concept links that evidence to your claim.

Distinguish a content gap from a skill gap. Choose one missed MCQ. Decide whether you lacked the concept or misapplied research reasoning, and plan a short corrective exercise.
