

AP Statistics Score Calculator

Choose your test form, enter rubric points, and see the calculation. The named historical or publisher mode includes its exact 1–5 conversion; the 2027 mode shows a weighted practice composite.

May 2027 format: weighted practice composite

Applies the published section weights to practice points. This mode returns a weighted practice composite, not a predicted AP 1–5 grade.

Input	Allowed values	Example	Your score
Multiple choice correct	0 to 42	28	_____
Multi-focus: Practices 1 and 2	0 to 10	6	_____
Multi-focus: Practices 3 and 4	0 to 10	7	_____
Inference	0 to 10	8	_____
Multi-focus: Practices 2, 3 and 4	0 to 10	5	_____

Calculation

$$50 \cdot \text{mcq} / 42 + 50 \cdot (q1 + q2 + q3 + q4) / 40$$

Worked example

The example gives 65.8333/100 before display rounding. It does not establish an AP 1–5 result; a score conversion requires a matched test form and conversion table.

College Board 2012 public practice exam - exact form only

Use only after scoring this exact practice test with its own answer key and rubrics. This conversion is not the current official exam curve.

Input	Allowed values	Example	Your score
Correct scored MCQ; exclude question 14	0 to 39	27	_____
2012 FRQ 1	0 to 4	3	_____
2012 FRQ 2	0 to 4	3	_____
2012 FRQ 3	0 to 4	3	_____
2012 FRQ 4	0 to 4	3	_____
2012 FRQ 5	0 to 4	3	_____
2012 FRQ 6	0 to 4	2	_____

Calculation

$$1.2820 * \text{mcq} + 1.8750 * (q1 + q2 + q3 + q4 + q5) + 3.1250 * q6$$

Worked example

Using the printed coefficients gives 68.9890; round only the final total to 69. The matching conversion table gives AP 4 for this form.

AP score for the selected practice form

Minimum composite	Practice estimate
70	5
57	4
44	3
33	2
0	1

Historical or publisher practice-form result only. It is not a prediction calibrated to May 2027.
