

AP Environmental Science Score Calculator

Choose your test form, enter rubric points, and see the calculation. The named historical or publisher mode includes its exact 1–5 conversion; the 2027 mode shows a weighted practice composite.

May 2027 format: weighted practice composite

Applies the published section weights to practice points. This mode returns a weighted practice composite, not a predicted AP 1–5 grade.

Input	Allowed values	Example	Your score
Multiple choice correct	0 to 80	56	_____
Design an investigation	0 to 10	7	_____
Analyze and interpret quantitative data	0 to 10	6	_____
Analyze a problem and propose a solution using calculations	0 to 10	8	_____

Calculation

$$60 * mcq / 80 + 40 * (q1 + q2 + q3) / 30$$

Worked example

The example gives 70.0000/100 before display rounding. It does not establish an AP 1–5 result; a score conversion requires a matched test form and conversion table.

Princeton Review AP Environmental Science Prep - Practice Test 1, asset ISBN9780593451113

Use only after scoring this exact practice test with its own answer key and rubrics. This conversion is not the current official exam curve.

Input	Allowed values	Example	Your score
Multiple choice correct	0 to 80	56	_____
Design an investigation	0 to 10	7	_____
Analyze an environmental problem and propose a solution	0 to 10	6	_____
Analyze a problem and propose a solution using calculations	0 to 10	8	_____

Calculation

$1.125 \cdot mcq + 2 \cdot (q1 + q2 + q3)$

Worked example

Using the printed coefficients gives 105.0000; round only the final total to 105. The matching conversion table gives AP 4 for this form.

AP score for the selected practice form

Minimum composite	Practice estimate
107	5
90	4
73	3
56	2
0	1

Historical or publisher practice-form result only. It is not a prediction calibrated to May 2027.
